

Remarks:

I concur and accept the findings of the examiner.

I cancel claims 1 through 10, as I feel claims 11 through 15 cover the matter I was trying to claim in claims 1 through 10.

The acceptance of claims 11 through 15, as opposed to the rejections or objections of the claims 1 thorough 10, reinforces my conviction that practitioners who prepare their own applications is akin to physicians trying to heal themselves. Claims 11 through 15 were written by a patent agent who formerly worked as a patent examiner for the USPTO, Mark Manley.

Hopefully, the claims are now in condition for allowance. If not, an examiner's amendment would be appreciated. Also, as I am handicapped by dyslexia, as well as ADD, correction of any such errors, which I have dilligently tried to avoid, by the examiner would be sincerely appreciated.

Request For Constructive Assistance

The undersigned has made a diligent effort to amend the claims of this application in accordance with your office action so that they define novel structure. If for any reason the claim of this application is not believed to be in full condition for allowance, applicant respectfully requests the constructive assistance and suggestions of the Examiner in drafting one or more acceptable claims pursuant to MPEP 707.07(j) or in making constructive suggestions pursuant to MPEP 706.03(d) in order that this application can be placed in allowable condition as soon as possible and without the need for further proceedings.

In closing, I wish to express my appreciation for your kind consideration and helpful assistance.

Very respectfully,

George H. Morgan
